

Child Delivery Plan

The child delivery plan is a special plan for pregnant women living in Los Angeles County. This plan covers labor and delivery for women who deliver their children at a County Hospital. If payment is made within seven days after leaving the hospital, the total cost for labor and delivery is \$1,500. The epidural injection is covered by the plan. Women would apply for Medi-Cal for their newborns.

To qualify for this plan, women must be unable to pay for the full cost of their medical care and have charges that Medi-Cal, Medicare or private insurance will not cover.

If a woman is less than 30 weeks pregnant, she should look into no cost Medi-Cal or AIM for her pregnancy care. If she is over 30 weeks pregnant, the Child Delivery Plan may assist her in paying for her labor and delivery.

Low-income pregnant women can contact their local County Hospital for additional information.
